Circulation Research

OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

EDITOR

CARL J. WIGGERS, M.D., SC.D.

ASSOCIATE EDITORS

HAROLD FEIL, M.D. AND JAMES W. MCCUBBIN, M.D.

EDITORIAL BOARD

I. L. CHAIKOFF, PH.D., M.D.
University of California School of Medicine, Berkeley, Calif.

JEFFERSON M. CRISMON, M.D.
Stanford University, Stanford, Calif.

RALPH I. DORFMAN, PH.D.
Worcester Foundation for Experimental Biology, Shrewsbury, Mass.

JOSEPH E. FLYNN, M.D.
Department of Pathology, University of Missouri Medical School, Columbia, Mo.

HYMER L. FRIEDELL, M.D., PH.D.
School of Medicine, Western Reserve University, Cleveland, Ohio

DONALD E. GREGG, PH.D., M.D.
Walter Reed Army Institute of Research, Washington, D. C.

WILLIAM F. HAMILTON, PH.D.
Medical College of Georgia, Augusta, Ga.

ALRICK B. HERTZMAN, PH.D.
St. Louis University School of Medicine, St. Louis, Mo.

CHARLES E. KOSSMANN, M.D., MED. SC.D.
New York University College of Medicine, New York, N. Y.

HAMPDEN C. LAWSON, M.D., PH.D.
School of Medicine, University of Louisville, Louisville, Ky.

ELLIOT V. NEWMAN, M.D.
School of Medicine, Vanderbilt University, Nashville, Tenn.

MARK NICKERSON, PH.D., M.D.
Faculty of Medicine, University of Manitoba, Winnipeg, Manitoba

ERIC OGDEN, B.SC., M.R.C.S., L.R.C.P.
Ohio State University College of Medicine, Columbus, Ohio

ROBERT E. OLSON, PH.D., M.D.
University of Pittsburgh, Graduate School of Public Health, Pittsburgh, Pa.

JAMES L. ORBISON, M.D.
School of Medicine and Dentistry, University of Rochester, Rochester, N. Y.

CARL F. SCHMIDT, M.D.
Department of Pharmacology, University of Pennsylvania Medical School, Philadelphia, Pa.

WALTER H. SEEGERS, PH.D., SC.D.
College of Medicine, Wayne University, Detroit, Mich.

CHARLES W. SHEPPARD, PH.D.
Biology Division Oak Ridge National Laboratory, Oak Ridge, Tenn.

EUGENE A. STEAD, JR., M.D.
School of Medicine, Duke University, Durham, N. C.

Circulation Research

OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

No. 1

Editorials

Interlingua Summaries ..... *Alexander Gode* 1

Dynamic Reactions Induced by Compression of an Artery ..... *Carl J. Wiggers* 4

Some Effects of Partial Pulmonary Valvectomy
Noble O. Fowler, Edgar P. Mannix and William Noble 8

The Histology of the Common Carotid Baroceptor Areas of the Cat .... *J. Boss and J. H. Green* 12

Circulatory and Renal Effects Following Transfusion of Human Blood and its Components to Dogs ..... *Hadley L. Conn, Jr., John C. Wood and John C. Rose* 18

The Relation of a Venous-Arteriolar Reflex to Transmural Pressure and Resistance in Small and Large Systemic Vessels ..... *Francis J. Haddy and Robert P. Gilbert* 25

Studies on Mitral Valve Function Effect of Acute Hypervolemia, Premature Beats and Other Arrhythmias ..... *Ben Friedman, William M. Daily and Russell H. Wilson* 33

Comparison of Changes in Mesenteric Resistance Following Splanchnic Nerve Stimulation with Responses to Epinephrine and Norepinephrine ..... *C. P. Deal, Jr. and Harold Green* 38

Cardiac Resuscitation and Neurologic Tolerance to Anoxia
Raymond C. Read, C. Walton Lillehei and Richard L. Varco 45

Reflex Alterations in Venomotor Tone Produced by Venous Congestion ..... *Robert S. Alexander* 49

The Hypocholesterolizing Effect of Gallogen and its Potentiation by Soybean Sterols
Thomas B. Clarkson, J. Stanton King, Jr. and Nelta Hyder Warnock 54

Cortisone Hypertension in Potassium-Deficient Rats with a Renal Ligature
Ray H. Rosenman, S. Charles Freed and Shirley St. George 57

Production of Hyperlipemia and Early Atherosclerosis in Rabbits by a High Vegetable Fat Diet ..... *Alfred Steiner and Seymour Dayton* 62

Effects of Pulmonary Embolism on the Pulmonary Circulation with Special Reference to Arteriovenous Shunts in the Lung ..... *Albert H. Niden and Domingo M. Aviado, Jr.* 67

The Continuous Recording of Central Venous Pressure Changes from an Arm Vein
Otto H. Gauer and Herbert O. Sieker 74

Changes in Central Venous Pressure after Moderate Hemorrhage and Transfusion in Man
Otto H. Gauer, James P. Henry and Herbert O. Sieker 79

Evidence of the Atrial Location of Receptors Influencing Urine Flow
James P. Henry, Otto H. Gauer and J. L. Reeves 85

The Effect of Moderate Changes in Blood Volume on Left and Right Atrial Pressures
James P. Henry, Otto H. Gauer and Herbert O. Sieker 91

An Analysis of Normal and Abnormal Left Atrial Pressure Pulse in Man
Jay L. Ankeney, Alfred P. Fishman and Harry W. Fritts, Jr. 95

Time Relationship of Dynamic Events in the Cardiac Chambers, Pulmonary Artery and Aorta in Man ..... *Eugene Braunwald, Alfred P. Fishman and André Cournand* 100

Production of Atrial Fibrillation in Dogs by Thyroid Administration and Acetylcholine Injection ..... *Phillip E. Leveque* 108

The Initiation of Ventricular Tachycardia and Fibrillation by Procaine in the Isolated-Perfused Rabbit Heart ..... *Leonard Grumbach* 112

American Heart Association 119
Contributors to this Issue 121

No. 2

Editorials
Current Trends in Atherosclerosis Research ..... *Louis N. Katz* 123
Initiation of the Blood Coagulation Mechanisms ..... *Walter H. Seegers* 126
Committee Report. Lipid Nomenclature 129
The Coronary Blood Flow in Pulmonary Emphysema and Cor Pulmonale
Leonard B. Rose and David L. Hoffman 130
Effect of X-Irradiation and Beta Emanation on Circulation in the Hamster Cheek Pouch
George P. Fulton, Brenton R. Lutz and Roma Kagan 133
Oxygen Consumption of the Completely Isolated Dog Heart in Fibrillation
Oleg Jardetzky, Ernest A. Greene and Victor Lorber 144
Factors Altering the Filling of the Isolated Left Ventricle of the Dog Heart. Effects of Epinephrine and Norepinephrine ..... *N. M. Buckley, M. Sidky and E. Ogden* 148
The Effect of Beta Sitosterol upon Intestinal Absorption of Cholesterol in the Rat
Meyer Friedman, Ray H. Rosenman and Sanford O. Byers 157
The Hypocholesterolizing Effect of Drugs—Fed Singly and in Combination—on Cholesterol-fed Cockerels ..... *J. Stanton King, Jr., Thomas B. Clarkson and Nelta Hyder Warnock* 162
The Effect of Potassium on the Occurrence of Petechial Hemorrhages in Renal Hypertensive Rabbits ..... *David B. Gordon and Douglas R. Drury* 167
Dynamics of Complete Right Ventricular Failure in Dogs Maintained with an Extracorporeal Left Ventricle ..... *John C. Rose, Eric J. Lazaro and Herbert P. Broida* 173
The Reduction of Autoprothrombin II Activity with Dicumarol
Shirley A. Johnson and Walter H. Seegers 182
Estimation of the Residual Volume of the Ventricle of the Dog's Heart by Two Indicator Dilution Technics ..... *J. P. Holt* 187
The Excitability Cycle of the Dog's Left Ventricle Determined by Anodal, Cathodal and Bipolar Stimulation ..... *R. Th. van Dam, D. Durrer, J. Strackee and L. H. van der Tweel* 196
Baroceptor Function in Chronic Renal Hypertension
J. W. McCubbin, J. H. Green and Irvine H. Page 205
An Experimental Study of Burger Triangles Constructed from Toad Hearts in situ
Zang Z. Zao 211
Cardiac Dilatation without Hypertrophy from Reduced Ambient Pressure in Rats
J. Clifford Stickney, David W. Northrup and Edward J. Van Liere 217
Serum Transaminase Levels in Experimental Pulmonary Infarction
Clarence M. Agress, Harvey F. Glassner and Howard I. Jacobs 220
The Collaterals of the Coronary Arteries in Normal and Pathologic Hearts
Giorgio Baroldi, Oreste Mantero and Guiseppi Scomazzoni 223
Book Reviews 230
American Heart Association 231
Contributors to this Issue 239

No. 3

Editorial
Mechanism of Circulatory Failure in Fresh and Sea Water Drowning ..... *H. G. Swann* 241
Theoretic Limitations of the Nitrous Oxide Method for the Determination of Regional Blood Flow ..... *Leo A. Sapirstein and Eric Ogden* 245

Production of Endocarditis with *Staphylococcus aureus* and *Streptococcus mitis* in Dogs with Aortic Insufficiency ..... *Benjamin Highman, Joseph Roshe and Paul D. Altland* 250
Planar Dipole Loops ..... *Ernest Frank* 257
Histochemical Evaluation of Canine Coronary Artery and Aortic Lesions Induced by Intravenous Allylamine ..... *L. L. Conrad, I. E. Gonzalez, W. Joel and R. H. Furman* 263
The "After-Drop" in Venous Occlusion Plethysmograms ..... *M. J. Allwood* 268
Studies with the Ganglionic Blocking Agent, Chlorisondamine Chloride in Unanesthetized and Anesthetized Dogs ..... *R. A. Maxwell, A. J. Plummer and M. W. Osborne* 276
Mechanism of Experimental Atrial Flutter ..... *A. Lanari, A. Lambertini and A. Ravin* 282
The Effect of KCl on Atrial Fibrillation Caused by Acetylcholine *J. H. Burn, A. J. Gunning and J. M. Walker* 288
The Initiation of Ventricular Tachycardia and Fibrillation in Isolated Hearts by Potassium Chloride ..... *L. Grumbach* 293
Effect of a Cardiac Glycoside (Cedilanid) on the Sodium and Potassium Balance of the Human Heart ..... *F. Gonlubol, A. Siegel and R. J. Bing* 298
Cardiac Responses to Sympathetic Stimulation ..... *Jorge Anzola and Robert F. Rushmer* 302
The Effects of Dicumarol on the Transvascular Exchange of T-1824-Labeled Protein in Rabbits ..... *Thomas E. Nelson, Jr., Elia Castronova and Chester Hyman* 307
The Electric Heart Center for the QRS Complex in Cardiac Patients ..... *George E. Seiden* 313
Hemodynamic Effects of Anemia with and without Plasma Volume Expansion *Noble O. Fowler, Robert H. Franch and Walter L. Bloom* 319
Mechanical vs. Reflex Effects of Diffuse Pulmonary Embolism in Anesthetized Dogs *M. Henry Williams, Jr.* 325
The Action of Acetylcholine and Epinephrine on the Cellular Membrane Potentials and Contractility of Rat Atrium ..... *J. Leyden Webb and Philip B. Hollander* 332
Movements of the Mitral Valve ..... *Robert F. Rushmer, Bliss L. Finlayson and Alden A. Nash* 337
Coronary Vasodilator Properties of Purine and Pyrimidine Derivatives *Mary M. Wolf and Robert M. Berne* 343
Books Received and Reviewed 349
American Heart Association 350
Contributors to this Issue 353

No. 4

Editorial
Why Attend Scientific Meetings? ..... *Carl J. Wiggers* 355
Physiologic Evidence for a Dual A-V Transmission System *Gordon K. Moe, James B. Preston and Harold Burlington* 357
Placental Transfer of Radioactive Digitoxin in Pregnant Women and Its Fetal Distribution *George T. Okita, Ernest J. Plotz and M. Edwards Davis* 376
The Left Atrial Pressure Pulses in Experimental Mitral Valve Lesions *O. M. Haring, C. K. Liu and H. D. Trace* 381
The Effectiveness of Hypertonic Glucose in Resuscitation of the Hypothermic Heart Following Potassium Chloride Arrest *George E. Mavor, Richard K. McEvoy and Earle B. Mahoney* 389
Influence of Pulmonary Arterial and Left Atrial Pressures on Pulmonary Vascular Resistance *Hans G. Borst, Maurice McGregor, James L. Whittenberger and Erik Berglund* 393
Measurement of Pulmonary Blood Flow Using the Indicator-Dilution Technic in Patients with a Central Arteriovenous Shunt *Alfredo A. Ramirez de Arellano, Peter S. Hetzel and Earl H. Wood* 400

The Importance of Sex in the Variability of the Cholesteremic Response of Rabbits Fed Cholesterol ..... *Louis C. Fillios and George V. Mann* 406
Demonstration of Preferential Flow of Blood from Inferior Vena Cava and from Right Pulmonary Veins Through Experimental Atrial Septal Defects in Dogs
Arthur W. Silver, John W. Kirklin and Earl H. Wood 413
Distribution of Blood (Fe^{59}) and Plasma (I^{131}) Volumes of Rats Determined by Liquid Nitrogen Freezing ..... *Newton B. Everett, Barbara Simmons and Earl P. Lasher* 419
Theory and Experiments on Schematized Models of Stenosis
H. C. Burger, A. G. W. van Brummelen and F. J. Dannenburg 425
Quantitative Method for the In Vivo Testing of Fibrinolytic Agents: Effect of Intravenous Trypsin on Radioactive Thrombi and Emboli
J. L. Ambrus, N. Back, E. Mihalyi and Clara M. Ambrus 430
In Vivo Fibrinolytic Activity and Pharmacology of Various Plasmin (Fibrinolysin) Preparations ..... *N. Back, J. L. Ambrus, S. Goldstein and J. W. E. Harrisson* 440
Intrinsic Deflections, Local Excitation and Transmembrane Action Potentials
Toyomi Sano, Masaru Ono and Takio Shimamoto 444
Amplifier for Linear Recording of Oxygen Saturation and Dye Dilution Curves
Curt Wiederhielm 450
Measurement of Circulation Times with NaI^{131} ..... *Reginald A. Shipley and Robert E. Clark* 456
The Pathway of Ventricular Depolarization in the Dog
Allen M. Scher and Allan C. Young 461
The Augmentor Action of the Sympathetic Cardiac Nerves
Walter C. Randall and Wayne G. Rohse 470
The Aortic Flow Pulse as Related to Differential Pressure
Merrill P. Spencer and Adam B. Denison 476
Effects of Beta Sitosterol on Regression of Cholesterol Atherosclerosis in Rabbits
William T. Beher, William L. Anthony and Gizella D. Baker 485
Partial Separation of an Oxytocic Principle from Preparations of Angiotonin
F. Merlin Bumpus, Hans Schwarz and Irvine H. Page 488
Catheter Induced Error in Hepatic Venous Sampling
Leo A. Sapirstein and Edward J. Reininger 493
A Muscle Column Preparation from the Rat's Left Ventricle
William C. Ullrick and William V. Whitehorn 499
Book Reviews 502
American Heart Association 504
Contributors to this Issue 508

No. 5

Editorial
Determinants of Cardiovascular Anomalies
M. M. Nelson, I. W. Monie and H. M. Evans 511
Experimental Evidence of Ventricular Diastolic Suction ..... *Gerhard A. Brecher* 513
Contractility and Extractability of Heart Actomyosin After Death
L. Dettli and R. J. Bing 519
Effect of Hypothermia on Oxygen Consumption and Energy Utilization of Heart
Henry Badeer 523
Complete Prevention of Cerebral Accidents in Malignant Hypertension ..... *André Robert* 527
Influence of Anomalous Blood Viscosity on Resistance to Flow in the Dog's Hind Limb
Matthew N. Levy 533

Peripheral Venoconstriction During Acceleration and Orthostasis
Edwin W. Salzman and Sidney D. Leverett, Jr. 540
Hypotension (Shock) in Dogs Produced by *Escherichia Coli* Endotoxin
Lloyd D. MacLean and Max H. Weil 546
Extrarenal Effects of Intravenous Pitressin in Nephrectomized Rats
Sydney M. Friedman, Miyoshi Nakashima and Constance L. Friedman 557
Absence of Vasomotor Responses to Epinephrine and Arterenol in an Isolated Intracranial Circulation ..... *Harold D. Green and Adam B. Denison* 565
Pressure Events of the Cardiac Cycle in the Dog: Normal Right and Left Heart
Howard L. Moscovitz and Robert J. Wilder 574
Effects of Fat on Blood Viscosity in Dogs ..... *Roy L. Swank* 579
In Vitro Study of Cholesterol Metabolism in the Calf Aorta
Nicholas T. Werthessen, Melvin A. Nyman, Russell L. Holman and Jack P. Strong 586
Effect of Hypothermia in Irreversible Hemorrhagic Shock
Allen H. Postel, L. Corsan Reid and J. William Hinton 594
The Image Tetrahedron in Man Determined by Reciprocal Stimulation of a Tridimensional Esophageal Electrode ..... *Jacob I. Hirsch, Stanley A. Briller and Charles E. Kossmann* 599
Increased Aldosterone Secretion in Response to Blood Loss
Gordon L. Farrell, Robert S. Rosnagle and Elizabeth W. Rauschkolb 606
Plasma Hypertensinase in Experimental Renal Hypertension
Concetta D. Harakal and Dean A. Collins 612
Metabolic Aspects of the Relationship Between the Contractility and Membrane Potentials of the Rat Atrium ..... *J. Leyden Webb and Philip B. Hollander* 618
A Catheter Tip Method for Measurement of the Instantaneous Aortic Blood Velocity
Donald L. Fry, Alexander J. Mallos and Alfred G. T. Casper 627
American Heart Association 633
Contributors to this Issue 642

No. 6

Editorial
Trends of Cardiovascular Research in Argentina ..... *Eduardo Braun-Menendez* 645
The Catechol Amine Content of Various Organs of the Cat After Injections and Infusions of Adrenalin and Noradrenalin ..... *U. S. von Euler* 647
Adrenergic Drugs and Blockade on Coronary Arterioles and Myocardial Contraction
Adam B. Denison, Suthip Bardhanabaedya and Harold D. Green 653
Effect of Elevation of Intraluminal Pressure on Renal Vascular Resistance
Francis J. Haddy 659
Specific Resistance of Body Tissues ..... *Herman P. Schwan and Calvin F. Kay* 664
The Electrolytes of Arterial Wall in Experimental Renal Hypertension ..... *Louis Tobian* 671
Role of Abdominal Aortic Branches in Pulse Wave Contour Genesis
Joseph M. Ryan, Ralph W. Stacy and Robert N. Watman 676
Lidocaine in Cardiac Resuscitation from Ventricular Fibrillation
Norman L. Carden and John E. Steinhaus 680
Left Ventricular Dimensions Recorded by Sonocardiometry
Robert F. Rushmer, Dean L. Franklin and Richard M. Ellis 684
Fractionation of the Cardiac Output of Rats with Isotopic Potassium ..... *Leo A. Sapirstein* 689
Splanchnic Hemodynamics and Oxygen Utilization During Hemorrhagic Shock in the Dog
Ewald E. Selkurt and Gerhard A. Brecher 693
Effect of Sympathomimetic Drugs in Acute Experimental Cardiac Tamponade
John T. Binion, William J. Morgan, Jr., George H. Welch and Stanly J. Sarnoff 705

Reactive Hyperemia in the Human Finger ..... *Dali J. Patel and Alan C. Burton* 710
Influence of Experimental Myocardial Infarction on Free Amino Acids of Dog Heart
Martin Chanin, Eugene Roberts and Alfred Goldman 713
Effect of Ganglionic Blocking Agents Upon Blood Flow and Resistance in the Superior Mesenteric Artery of the Dog ..... *Joseph H. Trapold* 718
Ventricular Suction in the Turtle ..... *James C. Kraner and Eric Ogden* 724
Ineffectiveness of Nitroglycerin as an Antiadrenergic Agent on the Cat Heart
Nicholas R. Popovich, Fred F. Roberts, Rodney L. Crislip and Hermann Menges, Jr. 727
A Theoretical Analysis of Intracavitary Blood Mass Influence on the Heart-Lead Relationship
Daniel A. Brody 731
Books Reviewed and Received 739
American Heart Association 740
Contributors to this Issue 743

INDEX OF SUBJECTS

Acetylcholine
in atrial fibrillation
from KCl, 288–299
production, 108–111
in atrial flutter, 282
cellular membrane potentials and atrial contractility affected by, 332–336
in procaine- and KCl-induced ventricular arrhythmias, 295
Aconitine, flutter produced by, 282, 283, 285
Action potentials
membrane
acetylcholine affecting, 332–336
epinephrine affecting, 335
metabolism and contractility related to in cardiac tissue, 618–625
transmembrane, electrocardiogram compared with, 444–448
Actomyosin, heart, contractility and excitability of after death, 519–520
Adenosine, vasodilator properties of, 343–347
Adrenalectomy, cortisone hypertension in, 57–60
Adrenalin, *see* Epinephrine
Adrenergic drugs, coronary arterioles and myocardial contraction affected by, 653–657
"After-drop," in venous occlusion plethysmograms, 268–274
Aldosterone, increased secretion of in blood loss, 606–611
Allylamine, coronary lesion induced by, histochemistry of, 263–267
American Federation for Clinical Research, 742
American Heart Association
Annual Meeting and Scientific Sessions, 120, 231, 350, 504–505, 633–634
awards, research, 231, 350, 633
application deadlines, 504, 633
lists of recipients, 234–238, 350–351, 635–641
Blakeslee awards, 231, 740
Blood Vessel Banks, publication, 233
Cardiac Clinics, 232
cardiovascular disease training program, 506
Cardio-Views kit, "The Cardiovascular System," 506–507
Cerebral Vascular Disease, Second Conference on, 634
Gold Heart awards, 740
ECG Test Book, 506
Heart Fund drive, 119
High Blood Pressure Council
meeting, 741
proceedings, 505
Lasker award, 740
postgraduate course announcements, 120
rehabilitation workshops, regional, 231
Research Committee of Scientific Council, 232
Rheumatic Fever Criteria, 232
Rheumatic Fever program, 351
"Secrets of the Heart," film, 742
USAF physicians' receipt of educational materials, 351
"World Trends in Cardiology" series, 741
American Rheumatism Association, 351
American Society for the Study of Arteriosclerosis, 351
Amino acids, free, myocardial infarction influencing, 713–716
Anemia, hemodynamic effects of, 319–323
Angiotonin, oxytocic principle partially separated from, 488–491
Anomalies, cardiovascular, determinants of, 511–512
Anoxia
cardiac, heparin and massage vs. brain damage in, 45–47
cardiac tissue metabolism, contractility and membrane potentials affected by, 618–620
in drowning, 243
Anoxemia, in pulmonary embolism, 68–69, 71–72
Aorta
abdominal branches, role of in pulse wave contour genesis, 676–679
blood velocity in, catheter tip method for measuring, 627–631
cholesterol metabolism in, 586–592
flow pulse, related to differential pressure, 476–482
insufficiency
endocarditis produced by Staphylococcus and Streptococcus in, 250–255
method for controlled production of, 250
Aramine, in acute experimental cardiac tamponade, 705–708
Armed Forces Institute of Pathology, cardiology course, 232
Arrhythmias
mitral valve function in, 35–36
see also Fibrillation; Flutter; Tachycardia; *etc.*
Arterenol
blood pressure affected by, 728–729
coronary arterioles and myocardial contraction affected by, 653–657
heart rate affected by, 728–729
intracranial arterial resistance after, 566–572
Arterial resistance
aortic, 480–481
intracranial, in occlusions and after epinephrine and arterenol injections, 566–572
mesenteric
ganglionic blocking agents affecting, 718–722
after splanchnic nerve stimulation, 38–43
in pulmonary embolism, 69–70
systemic, transmural pressure influencing, 25–31
Arterial wall, electrolytes of, in renal hypertension, 671–674
Arteries
carotid
histology of baroceptor areas, 12–17
ligation of preventing cerebral accidents in malignant hypertension, 527–532
compression of, dynamic reactions induced by, 4–6
coronary
allylamine-induced lesions of, histochemistry of, 263–267
collaterals of, normal and pathologic, 224–228
dilator properties of purine and pyrimidine derivatives, 343–347
femoral, circulation times to, 457–459
pulmonary
preferential blood flow in, in atrial septal defects, 414–415, 417
pressures affecting vascular resistance, 393–399
Atherosclerosis
research, current trends in, 123–125
β-sitosterol vs. cholesterol, 485–487
vegetable dietary fat in genesis of, 62–65
Atherosclerosis Symposium, publication, 119–120
Atria
arrhythmias, thyroid and acetylcholine in production of, 108–111
contractility, acetylcholine effect on, 332–336

fibrillation
acetylcholine-induced, KCl vs., 288–291
and tachycardia, in mitral valve function, 35
flutter, mechanism of experimental, 282–286
metabolic relationships between contractility and membrane potentials, 618–625
pressure pulses, left, in experimental mitral valve lesions, 381–386
pressures in
blood volume affecting, 91–93
in fibrillation, 289
in mitral valvular disease, 97–98
normal, 95–96
pulmonary vascular resistance affected by, 393–399
and time relationships of hemodynamic events, 101–105
receptors influencing urine flow located in, 85–89
septal defects, preferential blood flow in, 413–418
Autoprothrombin II, dicumarol reducing activity of, 182–186
A-V transmission system, dual
arrhythmias related to, 373–374
hypothesis of, 370–373
physiologic evidence for, 358–370

Bacterial endocarditis, experimentally produced in aortic insufficiency, 250–255
Bacterial hypotension (shock), from *Escherichia coli* endotoxin, 546–554
Baroceptor areas, histology of common carotid in cat, 12–17
Baroceptor function, in renal hypertension, 205–209
Blood cells and blood components
radiation changing, 136–138, 141
in right ventricular failure, 177–178
Blood coagulation, initiation of mechanism of, 126–128
Blood flow
aortic, pulse related to differential pressure, 476–482
catheter-induced error in hepatic vein sampling, 493–497
coronary, in pulmonary emphysema and cor pulmonale, 130–132
ganglionic blocking agents affecting, 718–722
in hemorrhagic shock, 696–698
preferential shunting in experimental atrial septal defects, 413–418
pulmonary, measurement of in patients with central arteriovenous shunts, 400–404
rate related to blood pressure, 533–538
regional, limitations of nitrous oxide determinations, 245–249
through stenosis, 425–428
velocity, aortic, catheter tip method for measuring, 627, 631
in ventricular fibrillation, 175, 180
Blood gas, in pulmonary embolization, changes in, 68–69
Blood mass, intracavitary, heart-lead relationship influenced by, 731–738
Blood pressure
in anemia, 321–323
atrial, *see* Atria, pressures in
augmentor action of sympathetic cardiac nerves, 470–474
cardiac chamber and great vessel time relationships with hemodynamic events, 100–105
in cardiac cycle of normal dog, 574–577
central venous
continuous recording of from arm vein, 74–78
hemorrhage and transfusion affecting, 79–83
in right ventricular failure, 175–177
and cholesterol metabolism in aorta, 587–588
flow rate related to, 533–538
in hemorrhagic shock, 696–697
hypertension
cerebral accidents prevented in, 527–532
cortisone-, in potassium-deficient rats with renal ligature, 57–60
ganglionic blocking agents vs., 276–280
renal
arterial wall electrolytes in, 671–674
baroceptor function in, 205–209
hypertensinase in, 612–616
potassium vs. petechial hemorrhages in, 167–171
hypotension, from *Escherichia coli* endotoxin, 546–554
intraluminal, elevation of affecting renal vascular resistance, 659–662
intraventricular, heart rate, epinephrine and norepinephrine affecting, 151–152
nitroglycerin effect on, 728–729
Pitressin affecting, 559–562
pulmonary arterial
and left atrial pressures affecting pulmonary vascular resistance, 393–399
in right ventricular failure, 174–175
in pulmonary embolism, 68, 70–72, 326–327
sympathetic nerve stimulation affecting, 303–306
transmural, systemic vascular pressure influenced by, 25–31
valvectomy affecting, 8–11
Blood vessels
radiation causing vascular changes, 138–141
see also Arteries; Veins
Blood viscosity
anomalous, flow resistance from, 533–538
fat ingestion affecting, 579–584
Blood volume
in anemia, 320
atrial pressures affected by changes in, 91–93
changes, in blood loss and plasma substitute replacement, 608
distribution, organ and tissue, liquid nitrogen freezing determination of, 419–424
hypervolemia, mitral valve function in, 35–36
in ventricular fibrillation, 177–178
Body tissue, specific resistance of, 664–669
Book reviews
Blutgerinnungsfactoren (Deutsch), 230
Clinical Cardiography, Part I (Katz & Pick), 502–503
Excitability of the Heart (Brooks et al.), 349
The Harvard Lectures (1954–55), 502
Histamine (Ciba Symposium; Wolstenholme & O'Connor, eds.), 739
Medical Research; A Midcentury Survey (Lape, ed.), 230
Books received, 349, 509, 739
Brain
cerebral accidents prevented in malignant hypertension, 527–532
damage
anoxic, in semi-drowning experience, 243
in cardiac arrest, heparin and heart massage decreasing, 45–47
intracranial arterial reactions to occlusion, epinephrine and arterenol, 566–572
Burger triangles, from living toad hearts in situ, 211

Carbachol, cardiac function affected by, 334
Cardiac arrest
heparin and massage vs. brain damage in, 45–47
KCl-induced in hypothermic heart, hypertonic glucose vs., 390–392
Cardiac cycle, pressure events in normal dog, 574–577

Cardiac output
in anemia, 320–321, 322–323
fractionation of with isotopic potassium, 689–691
Cardiac tamponade, sympathomimetic drugs in acute experimental, 705–708
Carotid arteries, *see* Arteries
Castration, cholesteremic response affected by, 409, 410
Catechol amines, content of cat organs after epinephrine and norepinephrine infusions, 647–651
Cedilanid, blood potassium levels affected by, 298–300
Chlorisondamine chloride, hypotensive action of, 276–280
Chlorisondamine dimethochloride, arterial blood flow and resistance influenced by, 718–722
Cholesterol, dietary
drugs vs., 162–165
β-sitosterol in intestinal absorption of, 157–160
Cholesterol, serum
Gallogen and soybean sterols reducing, 54–56
after phenylbutyramide and Gallogen, 163–164
β-sitosterol vs., 485–487
vegetable dietary fat in origin of, 62–65
Cholesterol, tissue
metabolism of in calf aorta, 586–592
after phenylbutyramide and Gallogen, 164–165
β-sitosterol vs., 485–487
Circulation
coronary, adrenergic effects on, 653–657
pulmonary, after pulmonary embolism, 67–72
radiation effects on, 133–141
splanchnic, in hemorrhagic shock, 693–702
times, measured with NaI^{131}, 456
Congestion, venous, venomotor tone changes in, 49–52
Cor pulmonale, coronary blood flow in, 130–132
Coronary arterioles, adrenergic drugs and blockade affecting, 653–657
Coronary artery, *see* Arteries
Cortisone, hypertensive effect of in potassium deficient rats with renal ligature, 57–60

Decholin, circulation times, 457–459
Dicumarol
autoprothrombin II activity reduced by, 182–186
in transvascular exchange of plasma protein, 308–311
Digitoxin, placental transfer and fetal distribution of radio-, 376–379
Dilatation, cardiac, from reduced ambient pressure, 217–219
2,4-Dinitrophenol (DNP), atrial metabolism, contractility and membrane potential affected by, 623
Drowning, circulatory failure mechanisms in, 241–243
Dye dilution curves, amplifier for linear recording of, 450–455

Echo phenomena, A-V, 361–364, 366–373
Electrocardiogram
in atrial fibrillation, 290
in atrial flutter, 283–286
epinephrine-nitroglycerin effect on, 728
image tetrahedron in man, method of determining, 599–604
intracavitary blood mass influencing heart-lead relationship, 731–738
in mitral insufficiency, 382–383, 385
in mitral stenosis, 384–385
in potassium chloride-cardiac arrest, hypertonic glucose vs., 390, 391
in potassium chloride-induced ventricular arrhythmias, 293–295
QRS electric heart center location in cardiac patients, 313–318
RSR′ in incomplete right bundle-branch block, 104, 105
transmembrane action potentials compared with, 444–448
ventricular depolarization, 462–468
Electrokymography, of left atrium, in mitral valve dysfunction, 382–386
Electrolytes
arterial wall, in renal hypertension, 671–674
imbalance in drowning, 241–243
see also Potassium; Sodium; *etc.*
Embolism, pulmonary
hemodynamic effects of, 326–330
plasmin and plasminogen vs., 440–442
pulmonary circulation affected by, 67–72
trypsin vs., 430–438
Emphysema, pulmonary, coronary blood flow in, 130–132
Epinephrine (and norepinephrine)
vs. acetylcholine affects on cardiac function, 335, 336
blood pressure affected by, 728
catechol amine content of cat organs after, 647–651
coronary arterioles and myocardial contraction affected by, 653–657
and extrasystole production, 114–116
heart rate affected by, 728
intracranial arterial resistances after, 566–572
in KCl-induced ventricular arrhythmias, 293–296
splanchnic nerve stimulation by, mesenteric resistance after, 41–43
ventricular filling affected by, 154
ventricular mechanical impedance affected by, 152
Escherichia coli endotoxin, hypotension (shock) from, 546–554
Esterone, in cholesterol metabolism by aorta, 589–590
Estradiol, cholesteremic response influenced by, 408–410
European Congress of Cardiology, Stockholm, 506

Fat, dietary
blood viscosity affected by, 579–584
vegetable, hyperlipemia and early atherosclerosis from, 62–65
Fibrillation
atrial
acetylcholine-induced, KCl vs., 288–291
production of by thyroid and acetylcholine injection, 108–111
of isolated dog heart, oxygen consumption of, 144–146
and mitral valve function, 35
procaine-induced, 112–117
ventricular
cardiac massage and arrest vs., 389
in drowning, 241–242
dynamics of, 173–180
lidocaine in cardiac resuscitation from, 680–683
potassium chloride inducing, 293–296
Fibrinolytic agents
quantitative method for in vivo testing, 430–438
in vivo activity and pharmacology of, 440–442
Flutter
mechanism of experimental atrial, 282–286
mitral valve function in, 35

Gallogen, hypercholesterolizing effect of, 54–56, 162–165

Ganglionic blocking agents, arterial blood flow and resistance, mesenteric, influenced by, 718–722
Glucose
hypertonic, vs. KCl-induced cardiac arrest, 390–392
vs. substrate-depletion of atria, 621
Grants, research
Life Insurance Fund, 634–635
U. S. Public Health Service, 635
see also American Heart Association, awards

Heart rate
nitroglycerin-epinephrine-arterenol effects on, 728–729
sympathetic nerve stimulation affecting, 303–306
valvectomy affecting, 8–11
ventricular mechanical impedance affected by, 151–152
ventricular filling affected by, 153–154
see also Arrhythmias; Fibrillation; *and other variations*
Heart size, sympathetic nerve stimulation affecting, 303–306
Hemorrhage
aldosterone secretion increased in, 606–611
central venous pressure changes after, 79–83
in experimental endocarditis with aortic insufficiency, 253–255
petechial
radiation caused, and vascular-circulatory changes, 133–141
of renal hypertension, potassium vs., 167–171
shock of
hypothermia vs., 594–597
splanchnic hemodynamics in, 693–702
systemic pressures influenced by, 92, 93
Heparin, vs. neurologic damage in cardiac arrest, 45–47
Hexamethonium
chloride, arterial blood flow and resistance influenced by, 718–722
hypotensive action of, 277–278
Hydrocortisone, increased secretion of in blood loss, 607–610
Hyperemia, reactive, in human finger, 710–712
Hypertensinase, plasma, in experimental renal hypertension, 612–616
Hypertension, Hypotension, *see* Blood pressure
Hypothermia
heart, hypertonic glucose in resuscitation after KCl arrest, 389–392
oxygen consumption of heart affected by, 523–525
shock, irreversible hemorrhagic, affected by, 594–597
Hypoxemia, chronic, coronary collaterals in, 227–228
Hypoxia, as stimulus to coronary blood flow, 132

Ilidar
adrenergic splanchnic nerve blockade by, 40–41
coronary arterioles and myocardial contraction affected by, 653–657
Indicator-dilution technic, pulmonary blood flow measured by in patients with arteriovenous shunts, 400–404
Infarction
myocardial, and free amino acids in dog heart, 713–716
pulmonary, serum transaminase levels in experimental, 220–221
Infection
bacterial, *see* Bacterial
radiation causing increased susceptibility to, 138
viral, in cardiovascular anomalies, 511
Injury hypertrophy theory, tested by reduced ambient pressure to produce cardiac dilatation, 217–219
Inter-American Congress of Cardiology, Havana, 351, 506
Isopropylarterenol, coronary arterioles and myocardial contraction affected by, 653–657

Kidney
blood flow, after human-to-dog transfusion, 19, 21–22
catechol amine content after epinephrine and norepinephrine, 649
damage, in experimental endocarditis with aortic insufficiency, 255
vascular resistance influenced by elevation of intraluminal pressure, 659–662
see also Hypertension, renal
Korotkoff sounds, production of, 4

Levarterenol, cardiac effects of, 302
Lidocaine, in cardiac resuscitation from ventricular fibrillation, 680–683
Lipid nomenclature, recommendations for, 129
Liver
catechol amine content after epinephrine and norepinephrine, 649–650
cholesterol, β-sitosterol vs., 485–487
in hypotensive shock from *Escherichia coli* endotoxin, 548–554
venous blood, catheter-induced error in sampling, 493–497

Meetings, scientific
aims of attending, 355–356
international, 351, 506
see also American Heart Association *section in each issue*
Mitral valve
disease, left atrial pressure in, 97–98
function
arrhythmias in, 34–36
hypervolemia in, 35–36
method for studying, 33–34
left atrial pressure pulses in experimental lesions of, 381–386
movements of, 337–342
Myocardial contraction, adrenergic drugs and blockade affecting, 653–657
Myocardial infarction, and free amino acids in dog heart, 713–716

Negative pressure breathing, diuresis of, atrial location of receptors influencing, 85–89
Negative ventricular diastolic pressure, and diastolic suction, 513–517
Nerve stimulation, cardiac function affected by, 302–306
Nerves, sympathetic cardiac, augmentor action of, 470–474
New England Cardiovascular Society, 741–742
Nitroglycerin, ineffectiveness of as antiadrenergic agent, 727–730
Nitrous oxide, for determining regional blood flow, limitations of, 245–249

Occlusion
intracranial arterial resistances under, 566–571
vascular, pressure pulse in, 4–6
venous, plethysmographic "after-drop" in, 268–274
Oxygen
arterial saturation in pulmonary embolism, 327–330
consumption
of heart, hypothermia affecting, 523–525
of isolated dog heart in fibrillation, 144–146
myocardial, 729
saturation, amplifier for linear recording of, 450–455
utilization, in hemorrhagic shock, 700–701
see also Anoxia; Hypoxia

Pentapyrrolidinium, hypotensive action of, 277–278
Pentolinium tartrate, arterial blood flow and resistance influenced by, 718–722
Petechiae, hemorrhagic
potassium vs. in renal hypertension, 167–171
of radiation, 139, 140
Pediatric cardiology fellowships, 120
α-Phenylbutyramide, hypercholesterolizing effect of, 162–165
toxicity, 165
Phonocardiogram, in mitral valve lesions, 383, 384
Physostigmine, and acetylcholine sensitivity, 334
Pitressin, extrarenal effects of in nephrectomized rat, 557–563
Plethysmography, "after-drop" in venous occlusion, 268–274
Potassium
blood levels of influenced by Cedilanid, 298–300
changed levels of during bleeding, 609–610
deficiency, cortisone hypertension in, 57–60
distribution, effect of Pitressin on, 559–562
isotopic, fractionation of cardiac output with, 689–691
vs. petechial hemorrhages in renal hypertension, 167–171
plasma, in drowning, 241–242
Potassium chloride
vs. acetylcholine-induced atrial fibrillation, 288–291
cardiac arrest from, hypertonic glucose vs., 390–392
ventricular arrhythmias initiated by, 293–296
Pregnancy
determinants of cardiovascular anomalies, 511–512
placental transfer and fetal distribution of radioactive digitoxin in, 376–379
Premature beats
in evidence for dual A-V transmission system, 358–370
mitral valve function in, 35
Pressure pulses
augmentation of impinging, 4–5
energy loss of, in opening collapsed vessel, 5–6
left atrial, in mitral valve lesions, 381–386
see also Blood pressure
Procaine, ventricular arrhythmias initiated by, 112–117, 293–296
Pyruvate, vs. substrate depletion of atria, 622–623
Pulse wave contour, abdominal aortic branches in genesis of, 676–679

Radiation, vascular, circulatory and hematologic changes after, 133–141
Reciprocal rhythm, and dual A-V transmission system, 373
Research, cardiovascular
in Argentina, trends in, 645–646
in atherosclerosis, trends in, 123–125
grants for, *see* Grants

Salt imbalance, in semi-drowning experience, 243
Sex, cholesteremic response influenced by, 406–411
Shock
hemorrhagic
oxygen utilization in, 700–701
splanchnic hemodynamics in, 693–702
irreversible hemorrhagic, hypothermic vs., 594–597
β-Sitosterol
and cholesterol absorption in rat intestine, 157–160
in cholesterol atherosclerosis regression in rabbit, 485–487
Sodium
changed levels of during bleeding, 609–610
distribution, effect of Pitressin on, 559–563
plasma, in drowning, 241–243
Sonocardiography, left ventricular dimensions recorded by, 684–688
Soybean sterols, hypercholesterolizing effects of, 54–56
in combinations, 162–165
Splanchnic nerve stimulation, and mesenteric resistance, 38–43
Staphylococcus aureus and ***Streptococcus mitis,*** endocarditis produced by in aortic insufficiency, 250–255
Stenosing coronary disease, collateral circulations in, 226–227
Stenosis, flow and pressure relationships in, 425–428
Substrate depletion
effects of in rat atria, 620–621
glucose, sucrose and pyruvate vs., 621–623
Surgery, cardiovascular
of mitral valve, left atrial pressure in, 97
and time relationship of hemodynamic events in cardiac chambers and great vessels, 100–105
valvectomy, pulmonary heart rate and blood pressure affected by, 8–11

Tachycardia
mitral valve function in, 35
potassium chloride initiating, 293–296
procaine-induced, 112–117
of pulmonary valvectomy, 9
supraventricular paroxysmal, and dual A-V transmission system, 374
thyrotoxic, 109
Testosterone, cholesteremic response influenced by, 408–410
Thyroid extract, in atrial fibrillation production, 108–111
Transaminase, serum, in experimental pulmonary infarction, 220–221
Transfusion
central venous pressure changes after, 79–83
human-to-dog, circulatory and renal effects of, 18–23
replacement, in drowning treatment, 243
systemic pressures influenced by, 92
Trypsin
anticoagulant effect of, 436–438
lack of fibrinolytic effect of, 434–436

Uridine triphosphate, vasodilator properties of, 345–347
Urine flow, atrial location of receptors influencing, 85–89

Valvectomy, *see* Surgery, cardiovascular
Vectorcardiography, body surface potentials in planar dipole loops, 257–261
Venoconstriction, peripheral, during acceleration and orthostasis, 540–544
Venomotor tone, reflex changes of in venous congestion, 49–52
Ventricle, left
dimensions recorded by sonocardiography, 684–688
excitability cycle of dog's, 196–202
muscle preparation from rat for in vitro studies, 499–501
residual volume, methods for estimating, 187–194
Ventricle, right, unessential nature of, 179
Ventricles
depolarization pathway of in dog, 461–468
diastolic suction, experimental evidence of, 513–517, 724–726
see also Fibrillation

Wolff-Parkinson-White syndrome, and dual A-V transmission system, 373–374
Wyamine, in acute experimental cardiac tamponade, 705–708

Sturdily constructed and attractive binders stamped with the Journal's name and volume number are available for Volumes I, II, III, and IV. Each holds a year's issues in convenient form. Volume V binders (for 1957) are also available for subscribers who wish to file their new issues in this way, as they receive them.

Order *Circulation Research* binders from Grune & Stratton, Inc., Subscription Department, 381 Fourth Avenue, New York City 16. Enclose $1.50 for each binder desired, and specify volumes.
